

# 58\_Employees Earning More Than Their Managers Easy - Solution

Source - <https://leetcode.com/problems/employees-earning-more-than-their-managers/description/>

Running Notes:

- Write a solution to find the employees who earn more than their managers.

```
-- Write your PostgreSQL query statement below
SELECT e1.id,e1.name,e1.salary,e1.managerId,e2.id,e2.salary
FROM Employee e1
LEFT JOIN Employee e2
ON e1.managerId = e2.id
```

the above code gives me a table that has the employee, their salary, their manager and their salary

```
-- Write your PostgreSQL query statement below
SELECT e1.id,e1.name,e1.salary,e1.managerId,e2.id,e2.salary
FROM Employee e1
LEFT JOIN Employee e2
ON e1.managerId = e2.id
WHERE e1.salary > e2.salary
```

then I have just added the condition of salary

final code

```
-- Write your PostgreSQL query statement below
SELECT e1.name AS Employee
FROM Employee e1
```

```
LEFT JOIN Employee e2  
ON e1.managerId = e2.id  
WHERE e1.salary > e2.salary
```
