

Cards Issued Difference (Easy) Solution

source -  nicksinghtech JPMorgan Chase SQL Interview Question | DataLemur

Running Notes

- analyzing how many credit cards were issued each month
 - Question breakdown that lead to this final solution
1. name of each credit card
 2. highest issuance cards (with highest issued_amount) - lowest issuance cards
 3. Order by the difference in desc order

```
SELECT card_name, MAX(issued_amount) - MIN(issued_amount) as difference  
FROM monthly_cards_issued GROUP BY card_name;
```
