

64_Managers with at Least 5 Direct Reports Medium - Solution

Source - <https://leetcode.com/problems/managers-with-at-least-5-direct-reports/description/>

Running Notes:

- Write a solution to find managers with at least **five direct reports**.

```
-- Write your PostgreSQL query statement below
WITH main_CTE AS (SELECT managerId, COUNT(managerId)
FROM Employee
GROUP BY managerId
HAVING COUNT(managerId) >= 5)

SELECT name
FROM Employee
WHERE id IN (SELECT managerid FROM main_CTE)
```

first i found out those managers who have atleast 5 direct reports

then i got their ids and got the name from the Employee table, but there can be multiple managers, so i used to IN keyword
