

47_First Letter Capitalization II Hard - Solution

Source - <https://leetcode.com/problems/first-letter-capitalization-ii/description/>

Write a solution to transform the text in the `content_text` column by applying the following rules:

- Convert the **first letter** of each word to **uppercase** and the **remaining** letters to **lowercase**

```
-- Write your PostgreSQL query statement below
SELECT
    content_id, content_text AS original_text, INITCAP(content_text) AS new_text
FROM user_content;
```

The `INITCAP()` function converts the first letter of each word in a string to uppercase and the rest to lowercase. In other words, the `INITCAP()` function converts a string to a proper case.
