

92_MacBookPro User Event Count Easy - Solution

Running Notes -

- Count the number of user events performed by MacBookPro users.
 - filter device to mac book pro
 - group by event
 - count the number of events
- Output the result along with the event name.
- Sort the result based on the event count in the descending order.

```
select event_name, COUNT(event_name) as event_count
from playbook_events
WHERE device = 'macbook pro'
GROUP BY event_name
ORDER BY COUNT(event_name) DESC;
```
