

34_User's Third Transaction

Medium - Solution

Source - <https://datalemur.com/questions/sql-third-transaction>

Running Notes

- We are given the table below on Uber transactions made by users.
- Write a query to obtain the third transaction of every user. Output the user id, spend and transaction date.

```
WITH main_CTE AS (SELECT *,
DENSE_RANK() OVER(
PARTITION BY user_id
ORDER BY transaction_date
)
FROM transactions)

SELECT user_id, spend, transaction_date
FROM main_CTE
WHERE dense_rank=3
```
