

# 24\_Teams Power Users Easy - Solution

Source - <https://datalemur.com/questions/teams-power-users>

Running notes

- identify the **top 2** Power Users who sent the highest number of messages on Microsoft Teams in August 2022.
- Display the IDs of these 2 users along with the total number of messages they sent.
- Output the results in descending order based on the count of the messages.

This was a very easy question, just broke down the question and solved it

```
SELECT sender_id,  
count(sender_id) AS message_count  
FROM messages  
WHERE sent_date BETWEEN '2022-08-01' AND '2022-08-31'  
GROUP BY sender_id  
ORDER BY message_count DESC  
LIMIT 2;
```
