66_Find Customer Referee Easy - Solution

Source - https://leetcode.com/problems/find-customer-referee/description/

- Find the names of the customer that are **not referred by** the customer with `id = 2` .

- very similar to the question I solved before this (Q 65) ... similar logic used here

```
-- Write your PostgreSQL query statement below
SELECT name
FROM Customer
WHERE NOT COALESCE(referee_id,0) = 2
```
