77_Not Boring Movies Easy - Solution

Source - https://leetcode.com/problems/not-boring-movies/description/

Running Notes:

- Write a solution to report the movies with an odd-numbered ID and a description that is not `"boring"`.

- ordered by `rating` **in descending order**.

```
-- Write your PostgreSQL query statement below
SELECT *
FROM cinema
WHERE id%2=1 AND description NOT LIKE '%boring%'
ORDER BY rating DESC
```

this is again the easiest easy question

- I just solved point wise, first I filtered and got the odd ids by using modulo operations, then got the reviews where it didnt have boring and there can be anything in front and after it
