55_Duplicate Emails Easy - Solution

Source - https://leetcode.com/problems/duplicate-emails/description/

Running Notes

- Write a solution to report all the duplicate emails.

```
-- Write your PostgreSQL query statement below
SELECT email
FROM Person
GROUP by email
HAVING COUNT(email) > 1
```

This was way to easy to be easy

I just grouped by email, filtered to get the rows with count > 1 and selected their emails
