69_Big Countries Easy - Solution

Source - https://leetcode.com/problems/big-countries/description/

Running Notes:

Big C

- it has an area of at least three million (i.e., `3000000 km2`), or

- it has a population of at least twenty-five million (i.e., `25000000`).

Write a solution to find the name, population, and area of the **big countries**.

```
-- Write your PostgreSQL query statement below
SELECT name, population, area
FROM World
WHERE area >= 3000000 OR population >= 25000000
```

EASIEST EASY QUESTION .

- literally just copy pasted everything from the question into the solution lol
