70_Classes More Than 5 Students Easy - Solution

Source - https://leetcode.com/problems/classes-more-than-5-students/description/

Running Notes

- Write a solution to find all the classes that have **at least five students**.

```
# Write your MySQL query statement below
SELECT class
FROM Courses
GROUP BY class
HAVING COUNT(student) >= 5
```

very easy question, just have to group the data by class and find the count of the students in the class

Silly mistakes I make, let me write it here, so I definitely don't make it the next time - getting really excited after reading the problem that I completely forgot at least so rather than putting ≥ I put only >
