81_Sales Person Easy - Solution

Source - https://leetcode.com/problems/sales-person/description/

Running Notes:

- Write a solution to find the names of all the salespersons who did not have any orders related to the company with the name **"RED"**

We basically need to report all the other names than those salesman who have worked with RED

```
-- Write your PostgreSQL query statement below
WITH main_CTE AS (
    SELECT s.name
    FROM SalesPerson as s
    LEFT JOIN Orders as o
    ON s.sales_id = o.sales_id
    LEFT JOIN Company as c
    ON o.com_id = c.com_id
    WHERE c.name = 'RED')

SELECT name
FROM SalesPerson
WHERE name NOT IN (SELECT name FROM main_CTE)
```

Okay so what I've done in my main_CTE ... like my first query I found all the salesman who have worked with 'RED' and then in my next query I am displaying all the names except those who worked with 'RED'
