87_User Activity for the Past 30 Days I - Easy Solution

Source - https://leetcode.com/problems/user-activity-for-the-past-30-days-i/description/

Running Notes:

- Write a solution to find the daily active user count for a period of `30` days ending `2019-07-27` inclusively

```
-- Write your PostgreSQL query statement below
SELECT activity_date as day,
COUNT(DISTINCT(user_id)) as active_users
FROM Activity
WHERE activity_date BETWEEN '2019-06-28' AND '2019-07-27'
GROUP BY activity_date
```

so basically for every date from '2019-06-28' to '2019-07-27' I needed to report the user count - by counting the distinct user id.
