53_Rank Scores Medium - Solution

Source - https://leetcode.com/problems/rank-scores/description/

Running Notes:

- Write a solution to find the rank of the scores

- The ranking should be calculated according to the following rules:

  - The scores should be ranked from the highest to the lowest.

  - If there is a tie between two scores, both should have the same ranking.

  - After a tie, the next ranking number should be the next consecutive integer value. In other words, there should be no holes between ranks.

- Return the result table ordered by `score` in descending order.

_____

This is by far the most easiest medium question I've seen, by god I should get this only in my interviews 😛

```
-- Write your PostgreSQL query statement below
SELECT
score,
DENSE_RANK()
OVER(
    ORDER BY score DESC
) AS rank
FROM
Scores
```
